

# Drupal Security Report

[HackerTarget.com](http://HackerTarget.com)

HackerTarget.com is the world leader in online open source intelligence and security assessments. All scanning tools are on-line for easy and convenient access.

All HackerTarget.com Vulnerability Scan options are Free (limit of 4 / day)

| Server / IP                    | Web Sites                                | Intelligence                        | CMS                            |
|--------------------------------|--|-------------------------------------|--------------------------------|
| <a href="#">Nmap Port Scan</a> | <a href="#">WhatWeb Site Fingerprint</a> | <a href="#">DomainProfiler</a>      | <a href="#">WordPress Scan</a> |
| <a href="#">OpenVas Scan</a>   | <a href="#">SQL Injection Test</a>       | <a href="#">Fierce Domain Scan</a>  | <a href="#">Joomla Scan</a>    |
| <a href="#">SSL Check</a>      | <a href="#">Nikto Web Scan</a>           | <a href="#">Hosting Server Info</a> | <a href="#">Drupal Scan</a>    |
|                                | <a href="#">BlindElephant Scan</a>       |                                     |                                |

### Professional Services

- [Security Scanning Membership](#) additional scanning (\$4.99 / month or \$29.99 / year)
- [Manual Security Assessment](#) professional assessment with full report (from \$400 USD)

 This report is autogenerated using various sources and scripts. No guarantee is made to the accuracy of the information found. See <http://hackertarget.com> for full Terms of Service.

| Further Information                           | 8        |

This report is based on an automated security scan performed using passive data collection from crawling the web site.

It was generated on **Thu Jun 23 22:07:15 2011.**

[More Information](#)

## Drupal Site Info

Site URI:

Drupal Version:

Web Server:

X-Powered-By:

Page Title:

[www.drupal.org](http://www.drupal.org)

**Drupal Detected - Version Unknown**

✔ The drupal version was not found. Advanced version fingerprinting can be done with [blindelephant](http://blindelephant.com).

**Apache/2.2.3 (CentOS)**

**PHP/5.2.11**

**Drupal - Open Source CMS | drupal.org**

## Domain Reputation Check

The site [www.drupal.org](http://www.drupal.org) has been checked against web reputation services

| Ref | Service  | Site Check Result |
|-----|--|-------------------|
|     | Google SafeBrowsing finds this site as safe            | SAFE              |
|     | Norton SafeWeb determines this site to be Safe         | SAFE              |
|     | MyWot has rated the sites trustworthiness as Excellent | 93                |

## Site Links and Scripts

Links and scripts to external sites and unknown javascript **may indicate** the presence of malware or malicious scripting. Examine the results below, linking to sites of poor reputation or malware can result in [blacklisting by google](#) and other search engines.

### External Site Links

# Hosting Information for www.drupal.org

The following details about the server and hosting provider have been discovered.

|               |  |
|---------------|--|
| Domain:       | <b>www.drupal.org</b>                          |
| IP:           | <b>140.211.166.6</b>                           |
| Organization: | <b>Oregon State System of Higher Education</b> |
| AS Name:      | <b>NERONET</b>                                 |
| ISP:          | <b>OREGON STATE SYSTEM OF HIGHER EDUCATION</b> |
| City:         | <b>Klamath Falls</b>                           |
| Country:      | <b>United States</b>                           |

## Websites sharing your IP

These sites have been found to be sharing the servers IP address

## Appendix A : Additional Resources

Drupal is a stable and powerful content management system. A few simple steps can increase the security of the platform a great deal.

### The Basics

---

- \* **Back It Up** - Be ready to lose it all at anytime. If you have an up to date backup restoring is much easier
- \* Keep Drupal System up to date
- \* Keep all Plugins and Modules up to date
- \* Beware of untrusted Themes and Modules
- \* Rename admin account to a non-generic name
- \* Use strong passwords ( a dictionary word with a number after it is not a strong password! )
- \* Keep your password safe! Do not re-use it on other sites.
- \* Ensure you have up to date AV on your Windows Machine. Malware collects passwords.
- \* The underlying server must be well managed and in a secure state
- \* VPS or Dedicated server? Set up server monitoring (<http://www.ossec.net> is a good start)

### Advanced Security Testing

---

This report has been generated using automated scripts and tools, while it provides a good overview of the general security of the site and any obvious problems, it is far from a comprehensive security assessment.

[HackerTarget.com](http://HackerTarget.com) has a comprehensive security assessment offering that is in effect a simulated hacker attack against the target system. This assessment by its nature is much more aggressive than the automated review you are looking at now, and provides a full report with any security holes found along with recommendations for increasing the security of the system.

Alternatively there is a collection of security tools available for free and online for testing at [HackerTarget.com](http://HackerTarget.com).

### Further Information

---

There are a thousand and one guides for drupal security tips. Some of the best information is from the source.

[Secure Configuration from Drupal.org](http://Secure Configuration from Drupal.org)
